Practical Skills Module Specifications

List of Practical Skill Module Specifications

900221-000-00-PM-06	Use Cases with Python	L4	Cr11
---------------------	-----------------------	----	------

To demonstrate your mastery of the knowledge topics and achievement of the assessment criteria, your progress will be continuously assessed throughout the skills programme. These assessments involve interpreting evidence of your ability to perform specific tasks.

The practical tasks in this folder must be submitted to the facilitator upon completion. In this folder, you will find specific tasks that you are required to complete. The folders containing these tasks are named as follows:

- **Customer Management System Development**
- **Personal Toolkit Applications**
- **Game Development with Frameworks**
- **GUI Application Development**

Inside these folders, you will find workbooks containing practical exercises designed to test your understanding of the material covered. Ensure that you read the instructions carefully and submit your work in the appropriate task folder. These tasks will be added to your portfolio of evidence (PoE), which will be signed by your facilitator as evidence that you have successfully performed these tasks.

Pay close attention to your facilitator's instructions and ensure you complete the activities within the given time.

Purpose of Practical Skills: Module 6

Use Cases with Python, NQF 4

The focus of this module is to provide learners with opportunities to complete use cases using the Python programming language.

The learner will be required to:

PM-06-PS01: Complete Python exercises, either integrated at the end of relevant modules/sections or conducted at the conclusion of the skills program.

PM-06-PS02: Complete Python exercises, either integrated at the end of relevant modules/sections or conducted at the conclusion of the skills program.

PM-06-PS03: Use a preferred framework with functions to build a game.

PM-06-PS04: Use a preferred framework with functions to create a complete solution, applying all listed aspects within a contextualized scenario in a specific sector.

Provider Programme Accreditation Criteria

Physical Requirements:

- Valid licensed software and application, including OS
- Internet connection and hardware availability
- Examples and information specified in the scope statement and all the case studies, scenarios and access to hardware and software implied in the scope statements of the modules
- Remote learners: Provider must provide business IT simulation system (e.g. invoice processing)

Human Resource Requirements:

- Qualification of lecturer (SME):
 - NQF 5 industry recognised qualification with 1 year relevant experience
- Assessors and moderators: accredited by the MICT SETA

Legal Requirements:

- Legal (product) licences to use the software for learning and training
- OHS compliance certificate
- Ethical clearance (where necessary)

Exemptions:

- None, but the module can be achieved through RPL
